Greetings everyone!

I hope you enjoy exploring and experimenting with my Windows XP portfolio! You may be wondering why I chose Windows XP as the theme for this project. Initially, I had planned to create a Windows 2000-inspired design, as that was my first encounter with a computer. However, I discovered that someone else had already done something similar, so I decided to switch gears and focus on Windows XP instead. This operating system was one that I spent a lot of time with and it's where I first learned about software, small Windows hacks, and other nifty tricks. While there may be other portfolios out there with a Windows XP theme, this one is my unique spin on it.

I had wanted to create a Windows-themed portfolio for some time, and now that I have the skills to do so, I had a blast working on it.
