Hello there!
Hope you all enjoy looking trough and play around my Windows xp Portfolio!
Why Windows xp?
Originally the idea was to make a Windows 2000
Look alike as that was my first brush with a pc, but after I found out that someone has already done that and the idea was dropped.But i still could not give it up so i decided for Windows xp as this is the OS that i spent most of the time with and the first time i learned the ins and outs of software and small windows hacks,tricks among other things.
I'm sure there are many others out there,but this is my spin on it.
I wanted to do one for a while and now that I have the skills I did it and had a lot of fun doing it.
