🪪 Profile

I have been always interested in coding, I see it as an open door to endless possibilities.

I chose to be a full stack developer so I can see the bigger picture, have better understanding of the client needs and, at the same time, satisfy my curiosity to know more about the different ways of web development.

🧠 Skills

`JavaScript` `Node.js` `React.js`

`Express.js` `SQL` `Bootstrap` `Git`

`GitHub` `SCRUM` `Agile`

`Tailwind CSS` `CSS` `HTML5`

PC Hardware (Very good understanding of computer anatomy, drivers and components configurations and device connections.)

Soft Skills (Teamwork, Reliability, Problem-solving, Adaptability, Collaboration, Perform well in stressful situations, Communication)

🎸 Interests

Computer hardware and software (I enjoy configuring and assembling pc's, repair or just trying different things with software and OS.),

Cars (I like cars, engines and mechanics and repairing small issues on my own car.)

🎓 Education
